

PRE OPERATIVE INSTRUCTIONS

- Nothing to eat or drink 8 hours prior to procedure
- No aspirin products (Advil, Aleve, Ibuprofen, Motrin, Naprosyn, etc.) or blood thinning medications (Coumadin, Plavix) or Lasix 7 days prior to procedure
- If you are having an outpatient procedure, you must have someone there to drive you home
- If you have had any x-rays that will be needed for your procedure, you must hand carry them with you to the hospital. This doesn't include chest x-rays
- If you have any prosthesis or mitral valve prolapse, please contact nurse prior to the procedure.
- Any other special needs that are required, please inform nurse prior to procedure.
- Have all pre-op testing done at least two weeks prior to procedure, but not to exceed over 30 days.
